

FAIRshare is a H2020 EU funded project that aims to ensure that farm advisors and their organisations effectively use **Digital Advisory Tools and Services (DATS)** to support a more sustainable agriculture into the future.

What are **DATS**?

DATS are simply digital tools and technologies, including those on computers, mobile phones, mobile phone applications, that aim to help farm advisors in their everyday work of delivering a farmer-focused service. The use of DATS can support farmers and farm advisors in a number of ways including helping to streamline and make processes more efficient, such as administrative tasks, and by helping to support on-farm decision-making by being able to collect and analyse farm specific data, among a number of other benefits.

What is the **FAIRshare DATS Inventory**?

The FAIRshare DATS Inventory is a platform which aims to act as a **'one stop shop'** to host and share all the existing DATS across Europe. This inventory aims to increase the awareness of DATS that are already in existence and are ready to be adopted or adapted to different contexts. To date, we have collected over 200 DATS from all across Europe.

How can I upload my DATS to the **FAIRshare DATS Inventory**?

Log on to <https://fairshare-pnf.eu/> and sign up today to register your DATS!

Why should you upload your **DATS to the FAIRshare DATS Inventory**?

Uploading your DATS to the FAIRshare Inventory can bring you a number of benefits, including:

- Your DATS will be shared widely across the advisory and farming communities of Europe
- You can increase the use and accessibility of your DATS
- Your DATS can help with problem-solving for other advisors
- It will allow you to be connected and develop synergies with other DATS and/or advisors

THIS PROJECT HAS RECEIVED FUNDING FROM THE EUROPEAN UNION' HORIZON 2020 RESEARCH AND INNOVATION PROGRAMME UNDER GRANT AGREEMENT N. 863039
