FAIRShare aims to improve farmer engagement with digital technologies through sharing, adapting and enabling more use of digital advisory tools and services (DATS)

Practice abstract n°22

## Online application for monitoring livestock vaccination

THIS PROJECT HAS BEEN FUNDED BY THE EUROPEAN UNION HORIZON 2020 RESEARCH AND INNOVATION PROGRAMME  
GRANT AGREEMENT ID: 101019150

# Development of an online application for monitoring livestock vaccination

n°22

## Context

A livestock vaccination tracking application can be useful for the veterinarian to help keep track of the vaccination schedule of the animals in her/ his care. Such an application ensures:

- better management of the appointment booking
- better respect of the vaccination protocol
- follow-up and history of vaccination.

A vaccination application is especially beneficial for farmers raising different types of animals with different vaccination schedules.

A vaccination application facilitates the life of farmers by limiting their stress, and is a good way to manage animal welfare and keep animals safe by preventing the occurrence of epidemics.

## Recommendations

- Such an application should include a notification system to inform both the farmer and the referring veterinarian about upcoming vaccines;
- It should offer a complete overview of the vaccinations administered and the appointments.

THIS PROJECT HAS RECEIVED FUNDING FROM THE EUROPEAN UNION HORIZON 2020 RESEARCH AND INNOVATION PROGRAMME UNDER GRANT AGREEMENT N. 818488
