FAIRShare aims to improve farmer engagement with digital technologies through sharing, adapting and enabling more use of digital advisory tools and services (DATS)

Practice abstract n°37

An overview of soil condition for farmers, advisors and policymakers

THIS PROJECT HAS BEEN FUNDED BY THE
EUROPEAN UNION HORIZON 2020 RESEARCH
AND INNOVATION PROGRAMME
GRANT AGREEMENT ID 101019150

An overview of soil condition for farmers, advisors and policymakers

Innovative solution

Knowledge of the soil condition per field is extremely useful for farmers, advisors and policymakers. Farm Soil Water Plan (Bedrijfs Bodem en Water Plan, BBWP) allows for one-time data entry to provide each stakeholder with the relevant information:

Farmers

- Soil measures per field, adapted to soil, crop and groundwater characteristics
- By indicating the selected measure, opportunity to improve performance
- Simple representation of farmer's contribution to the soil and water quality, drought, biodiversity and climate.

Advisors

- Extensive background information on various measures to advice farmers
- Platform to discuss with farmers the implementation of policy challenges.

Policymakers

- Place to monitor regional assignments and follow up on farmers' contributions.

A platform that puts knowledge into practice and records recommendations, giving relevant stakeholders confidence that policy goals will be achieved.
