Inventory of existing trainings on digital tools

Context

The introduction to digital tools is often arduous because farmers feel lost among the abundance of digital tools on the market. Also, advisors might not always feel confident to guide them if they do not have much experience with digital tools.

Innovative solution

An inventory of existing training modules has been created on the FAIRshare website. Because lack of digital literacy is one of the barriers to effective use of DATS, the inventory contains both **general** and **DATS-specific** trainings. It was developed with partners from all across Europe. It took nearly 3 months to compile an inventory of 180 existing training modules.

The training modules are divided into groups representing the target audience. To refine and facilitate the search for training courses, they can be sorted. A targeted search by keyword is also available.

Scan the QR code to find your perfect training on the FAIRshare platform:
