# Training frameworks for targeted advisors training

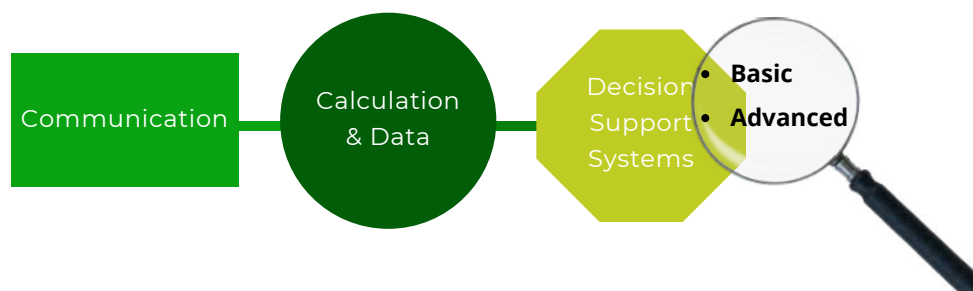

n°46

## Context

The main objective of the training modules is to facilitate the use of digital tools by farmers and advisors and to ease their transition to digital agriculture. In order to better meet the needs of the advisors, the development of the training frameworks was built on the basis of the existing training modules on the FAIRshare platform.

## Innovative solution

Training frameworks are series of general type and DATS specific training modules. The aim is to adopt the use of digital tools in the chosen category, considering their current level of digital skills:

Although the training frameworks are largely tailored to French-speaking advisors, they serve as an example for other countries to find equivalent trainings.

➔ You can check the training frameworks on the FAIRshare platform:
