FAIRShare aims to improve farmer engagement with digital technologies through sharing, adapting and enabling more use of digital advisory tools and services (DATS)

Practice abstract n°47

Online resource center for alternatives to  
glyphosate use

THIS PROJECT HAS BEEN FUNDED BY THE EUROPEAN UNION HORIZON 2020 RESEARCH AND INNOVATION PROGRAMME UNDER GRANT AGREEMENT N° 101018751

# Online resource center for alternatives to glyphosate use

n°47

## Context

The reduction of the use of phytosanitary products (commonly called pesticides) constitutes a strong citizen expectation and a necessity to preserve our health and biodiversity. Governments commit to global action plans for the reduction of the use of plant protection products and decide to put an end to the main uses of glyphosate.

## Innovative solution

An online resource center has been created in France to make available to the entire agricultural profession the existing solutions to get out of glyphosate. The Glyphosate Resource Center is an **interactive platform** that presents the main existing alternatives to glyphosate and more generally to herbicides for major production sectors:

field crops

viticulture

arboriculture

vegetables

horticulture/  
medicinal plants

tropical  
cultures
