FAIRShare aims to improve farmer engagement with digital technologies through sharing, adapting and enabling more use of digital advisory tools and services (DATS)

Practice abstract n°60

## CropManager - the dynamic fertilizer plan

THIS PROJECT HAS BEEN FUNDING FROM THE EUROPEAN UNION HORIZON 2020 RESEARCH AND INNOVATION PROGRAMME  
GRANT AGREEMENT N° 101019150

# CropManager - the dynamic fertilizer plan

## Innovative solution

CropManager enables farmers and advisors to make in-season adjustments to the fertilizer plan according to the growing conditions and prices of crop and input. The adjusted fertilizer plan can then be used for creation of high resolution application maps, that can be send directly to farm applications ie. fertilizer spreader.

The CropManager also offers a variety of other tools such as mapping for pesticides, liming, water balance, growth stage models, yield prognoses and more.

## Benefits of using this solution

- Quick and easy access to analytical data of all fields
- Intelligent graded sowing and fertilisation thanks to the precision mapping
- Using CropManager reduces the overall use of inputs on the farm and increases farm's financial income.
