

H2020 FAIRShare – radionica FAIRShare WP6 – T6.5

User Case (UC) “Questions and Answers)”

Zagreb / Brckovljani - Kusanovec/ 31.03.2023.

We are pleased to report that, within the H2020 FAIRShare project, a workshop aims for agricultural advisors additional familiarizing with digital advisory tools and services (DATS) in agriculture, as well as improving the methodology of working with farmers.

The methodological possibilities of advisory work and training improvements by using the ARIVA method, as well as the development and improvement of business through the application of innovative and digital technologies in agriculture, were presented. In addition to the presentation and further familiarization with the work of the "Questions and Answers" tool, reported as a user case within the FAIRShare project, other digital tools were also presented, such as AgBase, as well as a model for creating expert systems for the needs of expert advice in agriculture.

The training / workshop was held at the Ministry of Agriculture, Directorate for Professional Support for Agricultural Development, with a practical part and the conclusion of the workshop at the OPG "Zadravec Romina" in Brckovljani- Kusanovec. The workshop was attended by experts in advisory work certain fields, as well as management employees and county service managers. The workshop was moderated by Darko Lugonja, head of the Department for mechanization and application of innovative technologies in agriculture.
