FAIRShare aims to improve farmer engagement with digital technologies through sharing, adapting and enabling more use of digital advisory tools and services (DATS)

Practice abstract n°72

Standart Product Value Calculator

THIS PROJECT HAS RECEIVED FUNDING FROM
THE EUROPEAN UNION HORIZON 2020 RESEARCH
AND INNOVATION PROGRAMME
UNDER GRANT AGREEMENT N° 815485

Context

The Standard Product Value (SPV) Calculator is a tool for farmers in Hungary, which allows them to calculate the gross value of every product which they are currently working with on their farms.

Description of work

These calculations are using the National average value of certain crops, animals and other farmed goods. These calculations can help the farmers to save a lot of valuable time and that's why they like it and use it, but for certified calculations they have to check it with an advisor who participated in the trainings. Currently most of our advisors are already participated on the SPV Calculator trainings and they are able to use it very well, spot errors in the calculations and provide great insight to the farmers. The Calculations made with the SPV calculator are legally accepted documents in Hungary which you can use to apply for fundings, tenders and different agricultural projects and opportunities.

Recommendations

- Constant updates are needed so the Calculator can provide the best possible results for users
- Develop an automatic system that keeps the data fresh and the user experience as high as possible
